Integrating Artificial Intelligence and Machine Learning with Blockchain Security

Samia Jahan Ilma

Data Science ı Machine Learning I Generative AI I Driving decisions with transformed data & AI ı Let's connect!
Dhaka, Dhaka, Bangladesh

Summary

Unlock Insights by transforming data!
Being a data enthusiast, I have always been looking at ways of implementing technology into business needs. With an ardent interest in data driven solutions & Product building, I took a leap, transitioning into the field of data and unleashing new opportunities. Currently, a mentee at SCALER, Bengaluru, India studying in Data Science and Machine Learning. I also possess a professional proficiency in the field of financial fraud & compliance in MFS.

With over 1 and a half years working at bKash Limited I had hands-on experience in financial Crime and Fraud which helped me to attain expertise to the world of anti-money laundering and combating the financial terrorism. Working in Fraud & Dispute Management I worked with large datasets, analyzed data with advanced Excel formulas and visualized insights from it. Along with technical experience I acquired the process of Transactional Fraud & Dispute Analysis and Compliance Management in MFS and also involved in Anti-Fraud Awareness Campaigns, Training & Development ensuring the safety of digital transaction for the people. Previously worked as a Research Assistant at Islamic University of Technology (IUT) on Fraud Detection & Victim Analysis of MFS, concentrating on Hybrid Modelling.

I have a profound interest in playing with data. I try to amalgamate technologies to generate power business insights and enable needle moving business impact with valuable results. Working on to brush up my skills on Machine learning/Deep learning, NLP, Generative AI & and Visualization tools.
Please feel free slide into my DM (@LinkedIn) or contact me via email samiajahan@iut-dhaka.edu if any query occurs.

#DataScience #BusinessIntelligence # MachineLearning

P.S. I would really appreciate it if you take a minute and endorse my skills.

Experience

bKash Limited

Officer, Fraud and Dispute Management, External Affairs, External & Corporate Affairs

October 2022 - February 2024 (1 year 5 months)

Dhaka, Bangladesh

A journey towards serving the people for ensuring the security of digital transactions and supporting a cashless society with the leading MFS of the country.

Job Responsibilities:

- Analyzed and validated 86,000–125,000 fraud and mistaken-transaction cases, working with high-volume transaction, account, and reimbursement data to identify discrepancies and ensure data quality.
- Conducted transaction- and account-level analysis to identify anomalies, suspicious patterns, fraud trends, and seasonality, supporting data-driven risk decisions.
- Consolidated and analyzed monthly case data for Bangladesh Bank and BRAC Bank, covering approximately 1,000 fraud and 3,000 mistaken-transaction cases per reporting cycle.
- Monitored live operational dashboards tracking ticket volumes, case status, processing progress, and reimbursement amounts to identify trends, backlogs, and operational bottlenecks.
- Performed data reconciliation and financial analysis of reimbursement transactions (~10-12 crore BDT), including year-end balance validation and discrepancy resolution.
- Developed SLA, backlog, and performance reports supporting the evaluation of 34 employees and identification of process inefficiencies.
- Collaborated across intra- and inter-divisional teams, including IT, Finance, Commercial, Internal Control, and Operations, translating analytical findings into process improvements that contributed to a 36% reduction in reimbursement turnaround time
- Facilitated an anti-fraud awareness session for 50+ wage earners in Manikganj as part of bKash's initiative to educate 5,000+ Ayesha Abed Foundation artisans on secure digital transactions; explained common fraud

tactics, real-world scam scenarios, and practical prevention and response strategies.

Islamic University of Technology
Research Assistant
April 2022 - September 2022 (6 months)
Dhaka, Bangladesh

Principal Investigator : Dr. Mohammad Shamsu Uddin
Concentration: Hybrid Modelling
Responsibilities:
- Conducted research on AI/ML integration with Blockchain security, with applications to FinTech, digital currencies, and financial services.
- Investigated the application of Machine Learning algorithms to enhance security, privacy, scalability, and risk management within blockchain-based financial systems.
- Contributed to feasibility analysis of AI-driven FinTech applications in Bangladesh, assessing potential use cases and opportunities for financial-sector innovation.
- Researched applications of AI–Blockchain–IoT integration across banking and financial institutions, with emphasis on data security, privacy, standardization, scalability, and transaction risk.
